

PROPOSAL AT A GLANCE

Toone Construction Co. — 2026 Digital Engagement

A refreshed brand, a new website, and a Marketing Operating System built for the team to run.

The opportunity

Toone Construction is a 35-year-old Utah commercial and civil general contractor with a digital presence that does not match the work. The Utah commercial-GC comp set sits between 1,300 and 19,000 LinkedIn followers; Toone Construction is at 412. One additional mid-size commercial or public-works award per year (typical \$1M–\$15M+) pays for this engagement 20–200× over.

What we build (90 days)

- **Brand refresh** — updated wordmark, palette, typography, and brand voice document.
- **One production website** — new tooneconstruction.com with commercial and civil division pages, service-area pages, and project showcase.
- **SEO foundation** — Google Business Profile setup, structured data, business listings, target service-area pages.
- **Content engine** — 3-day jobsite + project photo and video shoot, 90-day post library, 2 hype videos.
- **Marketing Operating System** — five agents, approval queue, brand-voice training, full support and monthly reporting.

What you own at the end

- Your data, content, brand identity, and historical drafts — all yours.
- Tenant configuration: brand voice, services, target keywords.
- 90 days of approved content as training data for ongoing tuning.
- All accounts, integrations, and admin access.
- Standard operating procedures and a 15-minute-per-day office-manager runbook.

The Marketing Operating System

A superintendent sends photos and a short note via text from a jobsite. Five specialized agents draft Toone Construction-voice posts, replies, pages, and lead alerts. Office manager taps approve. Nothing publishes without a click. Replaces a marketing coordinator or agency retainer at a fraction of the cost, with a 15-minute-per-day routine and ~\$200/mo in infrastructure.

See it working: coolnerd-tt.github.io/toone-construction/marketing-os/sample.html — real generated drafts, in Toone Construction voice, from one superintendent text-in.

Investment

\$65,200	INCLUDED	\$850	up to \$350	~\$200
COMBINED BUILD — ONE TIME	CONCIERGE — MO 1–3	CO-PILOT — MO 4–6	SELF-SERVE — MO 7+	INFRA — AT COST

Build phase \$47,500 + Marketing Operating System build \$17,700. Self-serve billed at the lesser of \$350/mo or \$150/hour. Tier-down with 30 days' notice after month 3.

90 days, three phases

WEEKS 1–3 Discovery + Brand	WEEKS 4–9 Design + Build + OS	WEEKS 10–12 Launch + Activate
---------------------------------------	---	---

Next step

A 60-minute kickoff with Toone Construction leadership. On signature, the 90-day clock starts and the first jobsite shoot is scheduled inside week 2.
